Signature of Manager

Date 10/09/23

The Return should be sent to the Chief Inspector of Factories by 15<sup>th</sup> July of the current year.  
\*The average daily number should be calculated by dividing the aggregate number of attendances or working days by the number of working days during the half-year. In reckoning attendances, attendance by temporary as well as permanent employees should be counted and all employees (including apprentices) should be counted and all employees should be include whether they are employed directly or under contractors. Attendance on separate shifts (e.g. night and day shifts) should be counted separately. Days on which the factory was closed for whichever cause, and days on which the manufacturing processes were not carried on, should not be treated as working days. However, if more that 50% of workers employed (on the previous day) attend to repair, maintenance or other such work on closes days, such days should be treated as working days.

'Partial attendance for less that half a shift of working days should be neglected and attendance for half a shift or more should be treated as full attendance'
